

Beyond secure messaging

WHAT'S YOUR LONG-TERM CARE TEAM COMMUNICATIONS STRATEGY?

According to the KLAS Secure Communication 2016 vendor performance report, early adopters are leveraging secure messaging platforms for:

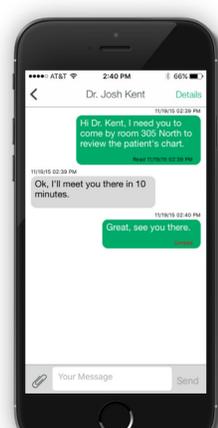

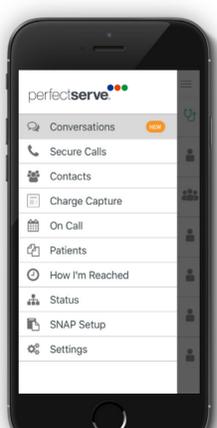

EFFECTIVE CLINICAL COMMUNICATIONS NEED MORE THAN SECURE MESSAGING.

Evaluate solutions with:

- 
EHR interoperability
 Access to real-time, accurate patient information empowers providers to deliver high-value care.
- 
ADT integrations
 Consolidating admission, discharge and transfer information and communications speeds time to treatment and reduces patient wait times.
- 
Automated event escalation
 Automatic notifications when messages go unread help avoid delays in patient care.
- 
Phone system interface capabilities
 Integration with legacy workflows leads to higher adoption rates.
- 
A cloud-based architecture
 Secure and reliable clinical communications across organizational boundaries are the key to value-based care.

PerfectServe® checks the box on secure messaging, supports advanced clinical communication and positively impacts patient care.

WHAT KLAS RESPONDENTS ARE SAYING:

“When I have a patient with a chest x-ray image, I have my residents photograph the image, add it to the PerfectServe app, and send it to me so that I can see it.”

PerfectServe ranks #1 for highest end-user adoption among physicians

96%

say PerfectServe is part of their long-term care team communication strategy

“We only have a limited deployment of the PerfectServe solution. We have nurses on the floor using a web interface to page the doctors with brief statements of what they are looking for and a call-back number...so the system has helped a lot in that regard. Moving forward, we will be implementing secure messaging between the nurses and doctors, and that will be even more helpful.”

96%

say they would purchase PerfectServe for their healthcare organization again

“PerfectServe has been a great partner for innovation. They have not backed down from a single challenge. At times they have even been able to deliver more than what has been expected. I am very happy with them.”
