

It's your time. Protect it.

PerfectServe puts the power to easily manage the way providers and patients contact you — especially outside of your scheduled shifts — right into your hands. Where it belongs.

1

PERSONAL CONTROL

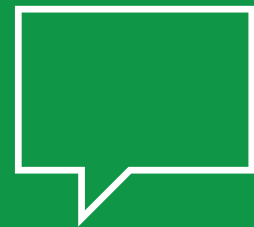

You control how you're contacted based on your own personal preferences. You can take calls in real time, route them as secure text messages and apply different preference settings based on your schedule.

2

FEWER INTERRUPTIONS

Routine messages that arrive when you're not working and not on call can be held for delivery until your next shift begins.

3

YOUR PRIVACY MAINTAINED

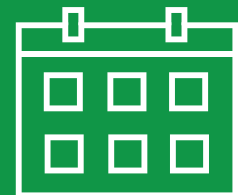

When you return or make calls through PerfectServe, Caller ID always displays your office phone number — even when you're calling from your personal cell.

4

EFFORTLESS CALL SCHEDULE MANAGEMENT

You can manage call schedules on the fly, in just a few clicks. Changes occur in real time and communications are routed accordingly.

500,000 clinicians

200 hospitals & health systems
