

THE TOP **10** REASONS YOUR PRACTICE NEEDS PERFECTSERVE

PerfectServe is the modern, secure call management solution designed to give you greater control over your clinical communications.

1 HIPAA compliance

PerfectServe helps you manage your HIPAA compliance risks across every mode of communication—voice, mobile, secure text, SMS, pager and more. Quickly and easily exchange information—including photos—with colleagues, without compromising PHI.

2 No more human error

When a call comes into your practice, PerfectServe responds to your rules for that moment in time and routes the call appropriately. No need for operators to read and interpret your instructions—human error is virtually eliminated.

3 Personal control

Easily control how you are contacted based on your personal preferences. Take call in real time or route them as secure, failsafe messages.

4 Fewer interruptions

Routine text messages that arrive at night can be held for delivery the next day.

5 No more lost messages

With failsafe contact, PerfectServe monitors when you answer a call or retrieve a secure text message. If you haven't responded within a specific period of time, PerfectServe automatically escalates notifications to reach you according to the protocol you've defined.

6 Get reimbursed faster

Using proven integration with practice management, EHR and billing applications, you can accurately and efficiently capture charges on your mobile device in fewer than 5 clicks.

7 Your privacy maintained

When you return or make calls through PerfectServe, your patients always see your office number instead of your cell or home number.

8 Effortless call schedule management

You and your staff can manage call schedules on the fly with just a few taps on the mobile app or clicks on the web. Changes take effect immediately.

9 Reduced liability

PerfectServe automatically documents every interaction so that the detail of past contact events can be retrieved.

10 Low cost

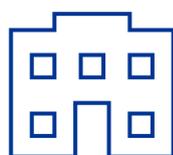

PerfectServe is almost always cheaper or cost-neutral when compared to live answering services—while providing more enhanced capabilities and features.

PERFECTSERVE SERVES MORE THAN

80,000 physicians

25,000 practices
