

Care Mobility for Nurses

Mobilizing Nurses to Streamline Patient Care

Studies show that more than a third of a nurse's day is spent communicating with patients, family, and other care team members. Deploying mobile devices can help nurses streamline communication and spend more time at the bedside.

Top Benefits of Nurse Mobility:

Communication workflows are crucial to a nurse's ability to deliver care, but when nurses use disparate communication tools, communication and care become delayed. Empowering nurses with a mobile communication solution can help to:

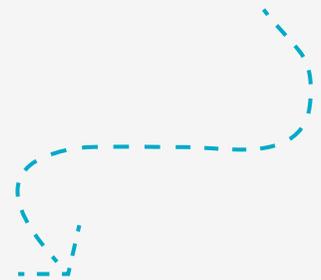

1. Route messages from the call system to patient care techs, preventing nurse overload
2. Support early interventions to **reduce code blue events**
3. Expedite care to improve patient quality and throughput
4. Reduce communication times between care team by **25-60%**
 - More time for nurses at the bedside, and less time tied to a computer

What PerfectServe Delivers:

- ✓ HIPAA compliant call and texting
- ✓ See your patient's entire care team on one screen
- ✓ Receive patient requests via phone with option to call back or delegate
- ✓ Nurses have the same phone number each day, regardless of the device they're using
- ✓ Telemetry alerts allow nurses to react to potentially serious events in real time

34%

of a nurse's
time is spent
communicating.

Only 16% is
spent on direct
patient care.
